Menu Structure
AutroSafe Release 4

AUTRO SAFE Self Verify®

Access Level > 2: Access by key
Access Level 3: Password restricted

(1) Show Status
- (1) Fire Alarms
- (2) Fire Warnings
- (3) Faults
- (4) Disablements
- (5) Detection Zones in Test
- (6) Activated Outputs
- (7) Active Sensors
- (8) Oil & Gas Inhibited Points

(from Disablements)
- (1) Detection Zones
- (2) Points
- (3) Fire Alarm Devices
- (4) Fire Alarm Routing Equipment
- (5) Outputs
- (6) Fault Warning Routing Equipment
- (7) Immediate Output Actioning
- (8) All

(from Activated Outputs)
- (1) Door Control Units
- (2) Low Location Light Units
- (3) Standard Control Units
- (4) Other Outputs
- (5) Fire Alarm Devices
- (6) Fire Alarm Routing Equipment
- (7) Fault Warning Routing Equipment
- (8) All

(2) Disable
- (1) Detection Zones
- (2) Points
- (3) Fire Alarm Devices → (1) Single Unit / (2) All in Alarm Zone
- (4) Fire Alarm Routing Equipment
- (5) Outputs → (1) Single Output / (2) All in Operation Zone
- (6) Fault Warning Routing Equipment
- (7) Carriers
- (8) Immediate Output Actioning

(3) Enable
- (1) Detection Zones
- (2) Points
- (3) Fire Alarm Devices → (1) Single Unit / (2) All in Alarm Zone
- (4) Fire Alarm Routing Equipment
- (5) Outputs → (1) Single Output / (2) All in Operation Zone
- (6) Fault Warning Routing Equipment
- (7) Carriers
- (8) Immediate Output Actioning

(4) System
- (1) Date and Time
- (2) Information
- (3) Access Level 3 → (1) Enter Access Level 3 – (password) / (2) Leave Access Level 3 / (3) Set Password
- (4) Printer → (1) Paper Feed
- (5) Change Language
- (6) Initialize
- (7) Cancel Inhibited Points
- (8) Day / Night Timers → (1) Start / (2) Stop / (3) Show Running Timers

(5) Service
- (1) Test → (1) Detection Zone Test (EN 54) → (1) Enter Test Mode / (2) Leave Test Mode
  - (2) Output Test → (1) Manual Test On / (2) Manual Test Off → (1) Fire Alarm Devices / (2) Fire Alarm Routing Equipment / (3) Fault Warning Routing Equipment / (4) Other Outputs
- (2) Log
  - (1) Fire Alarms
  - (2) Prealarms
  - (3) Early Warnings
  - (4) Faults
  - (5) Disable / Enable
  - (6) User Operations
  - (7) Tests
  - (8) All Events
  - (9) Log Setup → (1) Read Parameters / (2) Read Filter / (3) Clear Log
- (3) Loop Commands → (1) Disable Loop / (2) Enable Loop
- (4) Report
- (5) Upgrade → (1) Upgrade SW / (2) Upgrade Config / (3) Export Config / (4) Export Log / (5) View Upgrade Status / (6) Reboot System
- (6) Remote Access → (1) Web Access On / (2) Web Access Off
- (7) Dual Safety → (1) Transfer to Primary / (2) Transfer to Secondary
- (8) Oil & Gas Commands

(Report)
- (1) SV-Fault
- (2) Polluted
- (3) SV report to USB
- (4) View SV Report Status

(Oil & Gas Commands)
- (1) Inhibit Point
- (2) Cancel Inhibit Point
- (3) Set Alarm Limits
- (4) Get Measurement Values
